

Allergen Management for Schools

Allergen management within schools can be a minefield; many working within education settings have not had any in-depth training on allergies, intolerances, or coeliac disease. This is further complicated by the complex setting found in schools. Parents can often feel the lack of knowledge and empathy can create a source of anxiety. We will take you, step by step, through processes to ensure you can plan, give your staff the tools to create activities which are inclusive for everyone, and enable your school to go the extra mile to ensure the safety of your children and staff.

Who should attend?

This course is aimed at all levels of staff within an education setting; including admin, governors and those involved with the creation of policies and HACCP. The course is of a Level 1 induction standard. It would be beneficial to have catering staff on the training; they should, however, also attend level 2 or level 3 dependant on their role.

Delivery

The workshop can be delivered online and face to face (F2F*) for 60 – 80 minutes. There is a section at the end for Q & A.

A letter of attendance (CPD) per delegate will be provided for attendees in pdf format.

What we cover

- Communication and Planning
 - Creating an inclusive environment
 - Awareness training for parents and children
 - Awareness and charity activity assemblies
